MR. FOX FOOLS MR. BEAR.

NE warm, bright day in March

Mr. Bear woke up from his
long winter's pap and took a
stroll down the road. When
he came in sight of Cedar run he was
surprised to see his old friend, Mr. Fox
building a store, Mr. Fox said he intended
ed going into the market business, and
Air. Bear remarked that he would be
glad to be a partner. Eo it was agreed
that they would run the store to
gether, Mr. Fox to runish the chickens
and garden truck, and Mr. Bear to
bring in honey and fruit from the or
chards, as he was a good climber.
Now, down across the pasture was
the home of the widow Wolf, a lady

RAN OFF TO THE WOODS

NEVER TO COME BACK

Then he went back and began to polish
up a set of harness. When Mr. Bear
came in from supper he said:
"Mr. Bear, our stock of honey is low.
In the morning I will show you a fine
bee tree I found in the woods and we
can get plenty." So Mr. Bear agreed
the would go the next day. And that
night Mr. Fox hid the harness and the
buggy with red wheels in the bushes
near the pack.

"Mr. Bear, our stock of honey is low.
In the morning I will show you a fine
bee tree I found in the woods and we
can get plenty." So Mr. Bear agreed
the would go the next day. And that
night Mr. Fox hid the harness and the
buggy with red wheels in the bushes
near the place with a penny was to be seen. And
as he walked to the back door he saw
Mr. Bear hiding a new shiny buggy with
red wheels in the rear of the back and we have a bught a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
explains it. Mr. Bear has stolen all the
money, bought a buggy and thinks he
will get the widow. Well, maybe, I

night Mr. Fox hid the harness and the buggy with red wheels in the bushes near the hollow tree.

The next morning they met at the tree and Mr. Fox said: "Mr. Bear, I am sure if you will climb up to that hole you will find plenty of honey." But when he had climbed, Mr. Bear said there was not a drop of honey in sight. "That's very strange," remarked Mr. Fox. "It was there yesterday. Perhaps, it has dropped down in the tree. Climb down inside." But when Mr. Bear had gone down the inside of the tree he still said he could find no honey. "Well, we will go home then," said

"Well, we will go home then," said Mr. Fox. "You can get out by the hole on this side," and he ran to the bushes while had considerable property in her own right. And as Mr. Bear and Mr. Fox were both bachelors, they had beth been trying for some time to persuade the widow that they would each reake a good second husband. But she found it so hard to decide between the two that she said she would settle the question by marrying the first one was could bring her a shiny new buggy with red wheels.

Though Mr. Bear and Mr. Fox were both trying to get the widow, they got on all right in the store, and did not quarrel about the money, as they had decided not to divide that but once in four months. But one day Mr. Fox married the widow and rode about all happened to look in the money drawer, for the harness. Then when Mr.

# Cosmo Versal has made the discovery that the world is on the eve of a second deluge. He placards New York with posters, calling all to prepare for the coming flood. For his own safety he begins the building of an enormous ark and barely has it completed when reports are flashed about the world that the waters are actually beginning to rise. Finally the city of New York is all submerged but the huge City Hall, which is nearly all under water when the last of the Government battleships breaks away from the Brooklyn Navy Yard and the carried over against the City Hall, massing through the top of the building and sinking to the bottom. From this wreck a small boat arises and in this boat comes Amos Blank, the richest man in the world, alongside the ark. Blank has lost his mind, but he offers a billion dollars in securities, and waves the packet over his head, if Cosmo will take him aboard. He is taken in and then the ark is headed toward the East, where, it has been figured, is the world's highest

over his head, if Cosmo will take him aboard. He is taken in and then the ark is headed toward the East, where, it has been figured, is the world's highest land, and which will be the first landing place when the waters recede.

Meanwhile Professor Pludder has been conveying the President with a party in an aeroplane while the water is failing, and when the rain stops this wonderful flying machine rests on a mountain peak. The ark likewise came to rest on a high point of land, and so remained until a submarine vessel made its appearance near by. It was a French ship, and the captain announced he had the king of England on board.

The King of England tells of the downing of Great Britain, and then De Beluxchamps, a famous French naval experiences with heretofore unknown monsters of the abysmial deep. In the meantime Professor Pludder has safely carried the President of the United States and his party westward in his wonderful aeropiane, and they alight above the dangerous waters on one of the highest Colonadomountain peaks. At this instant both surviving parties suddenly face a stupendous crists.

They sail over submerged Europe and disover survivors among the tops of the

pendous crisis.

They sail over submerged Europe and disover survivors among the tops of the Pyrenees. Later they come upon the French submarine, the Jules Verne, and then all proceed westward until they reach the highest point in Colorado, where they find the President of the United States safely encamped.

#### CHAPTER XXIII. Robbing the Crown of the World.

OW that they were going with the current instead of striving to stem it, the Ark made much more rapid way than during the time that it was drifting toward the Black sea.

They averaged at least six knots, and, with the ald of the current, could have done much better, but they thought it well to be caulious, especially as they had so little means of guessing at their exact location from day to day. The water was rough.

water was rough.

There was, most of the time, little wind, and often a large number of the passengers assembled in the saloon.

The noise of the deluge on the roof was so much greater than it had been at the start that it was difficult to converse, but there was plenty of light, and they could, at least, see one another, and communicate by signs if not very easily by the voice. Cosmo's library was well selected, and many passed hours in reading stories of the world they were to see no more!

degrees 20 minutes east, minutes and the would be stake his reputation as a navigator upon it.

THE TIMES' DAILY SERIAL STORY.

The Second Deluge GARRETT P. SERVISS

over Beluchistan very well," said Cosmo, and we are now affoat above the val-ev of the River Indus. We have the lesert of Northwestern India ahead, and from that locality we can continue right down the course of the Ganges. In fact, it would be perfectly sale to turn north-ward and skirt the Himalayas within reach of the high peeks. I think that's what I il do."

Nevertheless when Cosmo Versal gave the order the captain turned the prowing the Ark toward the presumable location of the great Himalayan range hey were now entirely percent the captain turned the prowing the Ark toward the presumable location of the great Himalayan range hey were now entirely percent the transfer of the captain transfer o

tion of the great Himalayan range. They were now entirely occord the influence of the whiri that had at lirst got them into trouble, and then helped them out of it in Western Asia.

Behind the barrier of the ancient "Roof of the World" the sea was relatively calm, although, at times, they felt the effect of currents pouring down from the north, which had made their way through the lofty passes from the Tibetan side.

Cosmo calculated from his estimate of the probable rate of rise of the flood and from the flood.

But, in fact, they did not see it at all.

of the probable rate of rise of the flood and from the direction and force of the currents that all but the very highest of the Pamirs must already be subnerged. It was probable, he thought, that the vater had attained a level of between 1,000 and 18,000 feet. This, as subsequent

vents indicated, was undoubtedly inderestimate. The downfail in inderestimate orth must have been far greater than cosmo supposed, and the real height of the flood was considerably in excess of

even when the light was brightest, they kept farther south than was really necessary, and after passing, as they believed, over Delhi, steered south by east, following substantially the course that Cosmo had originally named along the line of the Ganges valley.

'Iney were voyaging much slower now, and after another ten days had passed any unexpected change came on. The an unexpected change came on. The downpour diminished in severity, and at times the sun broke forth, and for an hour or two the rain would cease entirely, although the sky had a coppery linge.

deceptive, its end might be close at hand.

Captain Arms seized the opportunity to make celestial and sciar observations which delighted his seaman's locart, and with great glee he informed Cosmo that they were in longitude 85 clared to the color of the sky changed so much that Cosmo declared to would wait no longer.

"Everest," he said, "is only 346 feet his reputation as a navigator those over India, and during the first three of those days there were intermittent downpours. But the whole of the last period of twenty-four hours was entired to the color of the sky changed so much that Cosmo declared he would wait no longer.

"Everest," he said, "is only 346 feet higher than Kunchingunga, and it may be sunk out of sight before we can get the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the last period of twenty-four hours was entired to the color of the color of twenty-four hours was entired to Captain Arm's setzed the opportunity to make celestial and schar observations which delighted his seaman's neart, and with areas glee he informed Cosmo that they were in longitude 88 degrees 20 minutes east, latitude 21 degrees 15 minutes north, and he would stake his reputation as a navigator

can go almost to the foot of Kunchin gunga without any danger. "Well, the name sounds dangerous "If you go fooling round any more I suppose you'll have your way, beaks," shouted Captain Arms, in a fog- me the bearings and we'll be off."

But, in fact, they did not see it at all, and thought at first that it had been totally submerged. At last they found it, a little rocky island, less than 200 feet above the water, according to Cosmo's careful measure, made from a distance of a ounter of a mile.

of a quarter of a mile.
"This is great news for us," he ex-claimed, as soon as he had compelted the work. "This will save us a long journey round. The water must now stand at about 27,900 feet, and, although there are a considerable number of peaks in the Himalayas approaching

the flood was considerably in excess of what he supposed.

If they could have seen some of the gigantic peaks as they approached the mountains in the eastern Punjab, south of Cashmere, they would have been aware of the error.

As it was, owing to the impossibility of seeing more than a short distance even when the light was brightest, they tent farther south than was really necessary. "We can, then, run right over the roof of the world, and there we'll be, in Tibet. Then we can determine from what side it is safest to approach Mt. Everest, for I am very desirous to get near that celebrated peak, and, if possible, see it go under.

"But the weather isn't safe yet," objected Captain Arms. "Suppose we should be caught in another downpour, and everything black about us." I'm not

and everything black about us! I'm not going to navigate this ship by search-light among mountains 28,000 feet tall. when the best beam that ever shot from

and at hight small stars were not clearly visible.

Cosmo was greatly surprised at this. He could only conclude that the central part of the nebula had been less extensive, though more dense than he ad estimated. It was only thirty-four days since the deluge had recommenced, and unless present appearances were hand.

When the best beam that ever shot from a mirror won't show an object a hundred fathoms away."

Very well, "Cosmo replicat: "We'll circle around south for a few days and the see what will happen. I think myself that it's not quite over yet. The fact is, I hope it isn't, for now that it has gone to fathom the covered."

We'll, it certainly couldn't do any more harm if it got up as high as the moon," responded the captain.

They spent four days sailing to and for over India, and during the first three of those days there were intermittent

the Wall" today, Virginia, 9, F, G.
